## Kitchen Video Display System

TriniTEQ's KV3000 Kitchen Video Display (KVD) System is a powerful tool for high volume service venues.

It features an easy to read screen, highly functional kitchen display controller and links to TriniTEQ's and select third party Point of Sale (POS) solutions.

### Kitchen Functions:

- Control new order access, park orders, clear completed orders, and recall cleared orders back to the display.
- Break up and reassemble orders separately for preparation and serving (QSR operation) as well as distinguishing between drive-thru and counter orders.
- Display 4 -16 orders per screen.
- Separate drive-thru and counter orders.
- Display items comprising bundles/linked food items (eg. coffee and a cake).
- Display each order's elapsed time via 3 uniquely colored, configurable order timers.
- View and export statistics to chart kitchen performance (NEW).

**The Solution for  
increasing Kitchen  
Turnaround,  
Accuracy and  
Profits.**

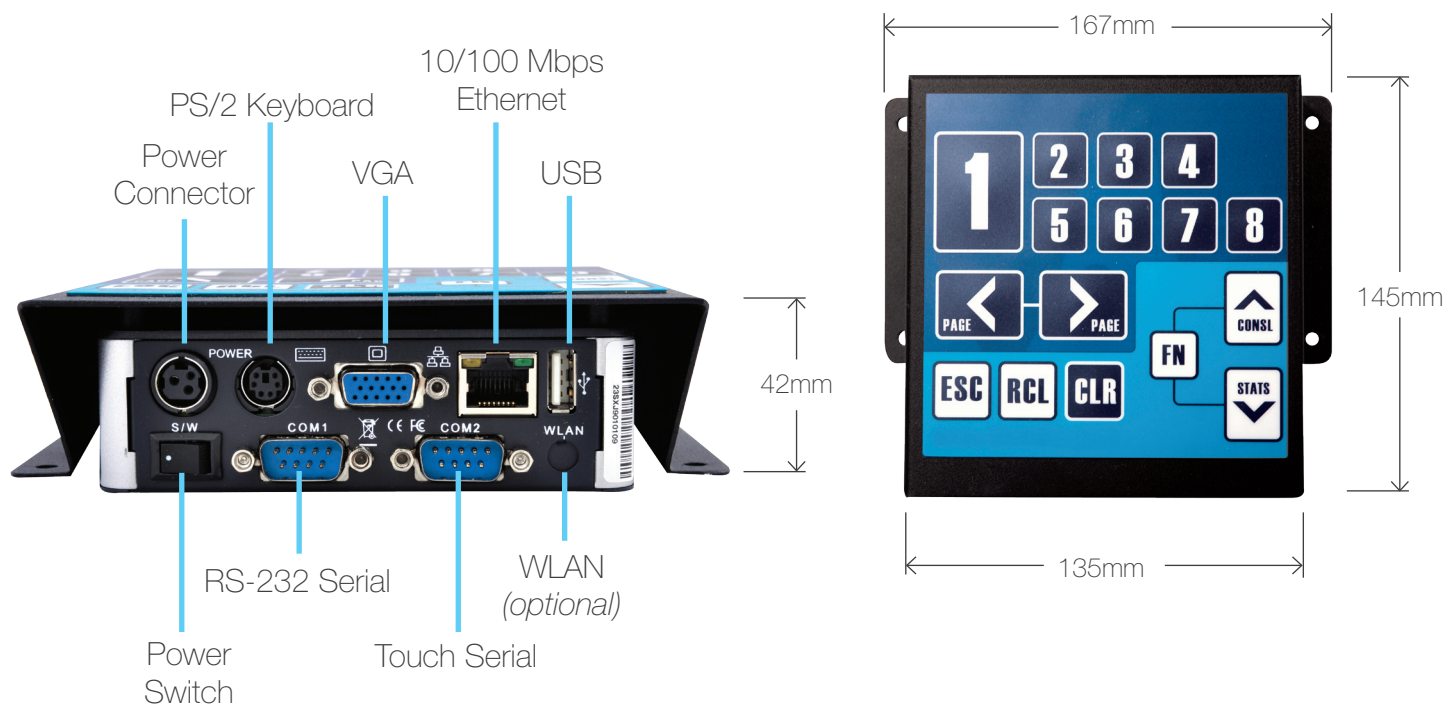

### Display Functions:

- Bump individual items when used with a touch screen LCD display (NEW).
- Print docket slips to an existing printer when an order or item is bumped.
- Control numerous kitchen sections via multiple KVD/LCD pairs (NEW).
- Display key items in up to 8 different colours.
- "Beep" upon order receipt and bumping.
- Save and redisplay up to 100 dockets in backup memory after power outages.
- Supports Serial and Ethernet connections.
- Withstand harsh kitchen environments with its spill proof casing.
