

Uniwell Lynx Key Features

Convenience Store / Supermarket

Uniwell Lynx has been designed to provide the ideal back-office companion to Uniwell's HX series of touchscreen POS terminals. With over 10 years of constant development, this software has specific features tailored to the needs of convenience stores and small supermarkets.

POS Programming

Program new items, price changes, POS touchscreen layouts and much more – quickly and easily from your back-office computer.

Uniwell Lynx also provides the ability to set up promotional pricing, so catalogued temporary price reductions can be prepared in advance, and simply sent to the register once they apply.

Stock Control

With an easy-to-use stocktake facility and powerful stock movement tracking, you can be in complete control of your inventory.

Uniwell Lynx also integrates with selected Datalogic and Honeywell Portable Data Entry terminals, allowing more accurate and quicker stocktaking, as well as price checking and purchased stock entry.

Tailored Reporting

Uniwell Lynx provides a number of powerful reports designed to help you to manage your business efficiently:

- Reorder Reporting – lets you know items that have fallen below the reorder level you've set, and how much to order
- Worst Sellers/Zero Item Sales - which of your items aren't moving?
- Summary Report – periodic snapshot of the overall business

Emailed Reports

Preconfigure a set of Sales or Stock Analysis Reports and have them emailed to your smartphone, tablet or home-office computer on a regular basis. Or have key staff receive applicable reports via email, allowing them to action tasks without the need to physically check the software for information.

Cloud Backup

A regular backup routine provides peace of mind. Uniwell Lynx can be configured to perform a daily backup directly to your cloud drive folder. So with so many cost effective cloud storage solutions available, keeping your valuable sales and stock data safe has never been easier.
