

# Uniwell Lynx Key Features

## Fast Food Outlets

---

Uniwell Lynx has been designed to provide the ideal back-office companion to Uniwell's HX series of touchscreen POS terminals. With over 10 years of constant development, this software has specific features tailored to the needs of fast food outlets.

---

### POS Integration

Program new items, price changes, kitchen printer settings, POS touchscreen layouts and much more – quickly and easily from your back-office computer.

Uniwell Lynx also integrates with the Wastage feature of Uniwell HX terminals – allowing wastage items to be entered directly at the POS terminal, and then reported on in the back office.

---

### Customer Accounts

Fast food stores that provide a catering service may have wholesale accounts with local businesses. Uniwell Lynx integrates with the Customer Accounts function of Uniwell POS Terminals, allowing your wholesale customers to purchase at the point of sale, and then receive invoices and statements from the back-office.

---

### Tailored Reporting

Uniwell Lynx provides a number of powerful reports designed to help you to manage your business efficiently:

- Hourly Sales by Day – provides a 7 day overview of hourly sales, allowing you to make staff rostering decisions based on sales
  - Summary Report – periodic snapshot of the overall business
  - Customer Reports – analyse the activity of wholesale customers
- 

### Emailed Reports

Preconfigure a set of Sales Analysis Reports and have them emailed to your smartphone, tablet or home-office computer on a regular basis. Or have key staff receive applicable reports via email, allowing them to action tasks without the need to physically check the software for information.

---

### Cloud Backup

A regular backup routine provides peace of mind. Uniwell Lynx can be configured to perform a daily backup directly to your cloud drive folder. So with so many cost effective cloud storage solutions available, keeping your valuable sales and stock data safe has never been easier.
